Tropical Science

The quarterly journal of the Tropical Products Institute

EDITOR : G. B. PICKERING, M.A., B.Sc., D.Phil., A.R.I.C.

ASSISTANT EDITOR : Miss M. KERSHAW, B.Com.

1964, *Vol. VI*

Contents

ARTICLES *page*

The Chemical Composition of Some Tropical Food Plants: I Finger and Bulrush Millets. By Miss R. M. Johnson and W. D. Raymond, *Tropical Products Institute* 6

Growth of *Aspergillus flavus* and Production of Aflatoxin in Groundnuts—Part IV. By D. McDonald and C. Harkness, *Ahmadu Bello University, Northern Nigeria* 12

Some Fundamental Difficulties in Popularizing Science. By M. W. Thistle, *National Research Council*, Canada 28

The Ecological Approach to Pest and Disease Problems of Cacao in West Africa. By W. Tinsley, *Department of Forestry, University of Oxford* 38

The Chemical Composition of Some Tropical Food Plants. II. Pigeon Peas and Cowpeas. By Miss R. M. Johnson and W. D. Raymond, *Tropical Products Institute* 68

Growth of Aspergillus flavus and Production of Aflatoxin in Groundnuts—Part V. By N. J. Burrell, J. K. Grundy and C. Harkness, *Pest Infestation Laboratory* 74

Observations on the Quality of Stored Cottonseed in Kenya. By F. Ashman, *Department of Agriculture, Kenya* 91

Lindane Contamination in Stored Sorghum and Millet in Northern Nigeria. By P. H. Giles, *Pest Infestation Laboratory* . . . 113

The Fight against the Locust: The Rôle of the Anti-Locust Research Centre. By P. T. Haskell, Director, *Anti-Locust Research Centre* . 122

Growth of *Aspergillus flavus* and Production of Aflatoxin in Groundnuts—Part VI. By D. McDonald, C. Harkness, and W. C. Stonebridge, *Ahmadu Bello University, Northern Nigeria* . . . 131

The Chemical Composition of Some Tropical Food Plants: III. Sesame Seed. By Miss R. M. Johnson and W. D. Raymond, *Tropical Products Institute* 173

Some Social Problems in Tropical Agriculture. By W. R. Stanton, formerly Head of Plant Sciences, *University of Malaya* . . . 180

The Use of Rice Hulls as Aggregate in Lightweight Concrete. By A. E. Chittenden and L. G. Flaws, *Tropical Products Institute* . . 187

CONTENTS

BOOK REVIEWS 47, 96, 155, 200

NEWS ROUND-UP 1, 61, 109, 169

INDEX

Volume VI, 1964

Scientific names and titles of books are printed in italics and personal names in capitals

Advances in Insect Physiology, Vol. 2. Ed. by BEAMENT, J. W. L. (Book Review) 155
Anti-Locust Research Centre; its role in the fight against the locust . 122
ASHMAN, F., Observations on the quality of stored cottonseed in Kenya 91
Aspergillus flavus, growth of, and production of aflatoxin in groundnuts:
Part IV 12
Part V 74
Part VI 131

Beekeeping, by SMITH, Francis G., (Book Review) 47
Bibliographies 50, 98, 159, 205
Biological Control of Insect Pests and Weeds. Ed. by DEBACH, Paul (Book Review) 156
Book Reviews 47, 96, 155, 200
Bulrush and finger millets, chemical composition of 6
BURRELL, N. J., HARKNESS, C., and GRUNDY, J. K., growth of aspergillus flavus and production of aflatoxin in groundnuts—Part VI . . 131

Cacao, ecological approach to pest and disease problems of . . 38
Chemical Composition of Some Tropical Food Plants:
I Finger and Bulrish Mullets 6
II Pigeon Peas and Cowpeas 68
III Sesame Seed 173
CHITTENDEN, A. E., and FLAWS, L. G., the Use of rice hulls as aggregate in lightweight concrete 187
Concrete, rice hulls used as aggregate in 187
Cottonseed, observations on quality of stored, in Kenya 91
Cowpeas, and pigeon peas, chemical composition of 68
Culture and Marketing of Tea, by HARLER, C. R., (Book Review) . . 201

Desert Animals. By SCHMIDT—NIELSON, K., (Book Review) . . 47

Essentials of Biological Chemistry, by FAIRLEY, J. L. and GILGOUR, G. L., (Book Review) 201

Finger and Bulrush Millets, Chemical Composition of 6
FLAWS, L. G. and CHITTENDEN, A. E., the use of rice hulls as aggregate in lightweight concrete 187

GILES, P. H., Lindane contamination in stored sorghum and millet in Northern Nigeria 113
Groundnuts, growth of *aspergillus flavus* and production of aflatoxin in 12, 74, 131

GRUNDY, J. K., BURRELL, N. J., and HARKNESS, C., growth of aspergillus flavus and production of aflatoxin in groundnuts 74

Handbook of Tropical and Sub-Tropical Agriculture, by MORTENSEN, E., and BULLARD, E. T., (Book Review) 155

HARKNESS, C., and McDONALD, D., growth of *aspergillus flavus* and production of aflatoxin in groundnuts—Part IV 12
HARKNESS, C., BURRELL, N. J., and GRUNDY, J. K., growth of *aspergillus flavus* and production of aflatoxin in groundnuts—Part V . . 74
HARKNESS, C., McDONALD, D., and STONEBRIDGE, W. C., growth of *aspergillus flavus* and production of aflatoxin in groundnuts—Part VI 131
HASKELL, P. T., the fight against the locust: the role of the Anti-Locust Research Centre 122

JOHNSON, Miss R. M. and RAYMOND, W. D., chemical composition of some tropical food plants
I Finger and Bulrush Millets 6
II Pigeon Peas and Cowpeas 68
III Sesame Seed 173

Life of Insects, by WIGGLESWORTH, V. B., (Book Review) 202
Life of Plants, by CORNER, E. J. H. (Book Review) 200
Lindane contamination in stored sorghum and millet in Northern Nigeria 113
Locust, the fight against: the role of the *Anti-Locust Research Centre* . 122

McDONALD, D., and HARKNESS, C., growth of *aspergillus flavus* and production of aflatoxin in groundnuts—Part IV 12
McDONALD, D., HARKNESS, C., and STONEBRIDGE, W. C., growth of *aspergillus flavus* and production of aflatoxin in groundnuts—Part VI 131
Millets, finger and bulrush 6
lindane contamination in stored 113
Mineral Deficiences in Hevea and Associated Cover Plates by SHORROKS, VICTOR M. (Book Review) 157

News Round-Up 1, 61, 109, 169

Pest and disease problems of cacao, the ecological approach to . . 38
Pigeon peas, and cowpeas, chemical composition of 68
Popularizing Science, some fundamental difficulties in 28

Principles of Agricultural Entomology, by EDWARDS, C. A., and HEATH, G. W. (Book Review) 200

RAYMOND, W. D., and JOHNSON, Miss R. M., chemical composition of some tropical food plants:
I Finger and Bulrush Millets 6
II Pigeon Peas and Cowpeas 68
III Sesame Seed 173
Reports, published by Tropical Products Institute, 1964 . 49, 97, 158, 204
Rice hulls, used as aggregate in lightweight concrete 187

Science, some fundamental difficulties in popularizing . . . 28
Sesame seed, chemical composition of 173
Social problems in tropical agriculture 180
Sorghum, lindane contamination in stored 113
Standards and Requirements for Fish Handling, Processing, Distribution and Quality Control. By TAPIADOR, D. D., and CARROZ, J. E. (Book Review) 96
Standard Methods for the Analysis of Oils, Fats, and Soaps, International Union of Pure and Applied and Chemistry (Book Review) . . 96
STANTON, W. R., some social problems in tropical agriculture . . 180

THISTLE, M. W., some fundamental difficulties in popularizing science . 28
TINSLEY, T. W., the ecological approach to pest and disease problems of Cacao in West Africa 38
Tropical agriculture, some social problems in, ... 180

LISTS OF PLATES AND FIGURES

THE CHEMICAL COMPOSITION OF SOME TROPICAL FOODSTUFFS: I. FINGER AND BULRUSH MILLETS

page

PLATE I

Bulrush Millet (Pennisetum typhoideum) in Bechuanaland . . . . . *facing* 8

PLATES II & III

Left: healthy plant of P. typhoideum. Right: plant affected by green ear disease. . . . . *facing* 8

SOME FUNDAMENTAL DIFFICULTIES IN POPULARIZING SCIENCE

FIGURE 1

Certain barriers to communication . . . 29

FIGURE 2

Stages of scientific sophistication . . . 31

FIGURE 3

Graph devised by J. A. Anderson to help a scientist suit his material to his audience. 36

PEST AND DISEASE PROBLEMS OF CACAO IN WEST AFRICA

FIGURE 1

Cacao farm in food condition 40

FIGURE 2

Cacao farm with initial capsid pocket . . . 40

FIGURE 3

Cacao farm with capsids and swollen shoot . . 41

FIGURE 4

Derelict cacao farm, debility aggravated by intercropping with maize and yams 41

THE CHEMICAL COMPOSITION OF SOME TROPICAL FOOD PLANTS: II PIGEON PEAS AND COWPEAS

PLATE I

Pigeon peas (×4). . . . . *facing* 70

PLATE II

Cowpea harvesting in progress . . . . . *facing* 70

GROWTH OF ASPERGILLUS FLAVUS AND PRODUCTION OF AFLATOXIN IN GROUNDNUTS—PART V.

PLATE I

A stack built on the ground at Mokwa . . *facing* 80

PLATE II

A stack built off the ground at Kano . . . *facing* 8

PLATES

PLATE III
A rack at Mokwa . . . . . *between* 80 *and* 81
PLATE IV
Base of the pole treatment at Mokwa . . . *between* 80 and 81
PLATE V
Pole treatment at Mokwa . . . . . *between* 80 and 81
PLATE VI
Nuts on ridges . . . . . *between* 80 and 81
PLATE VII
Nuts on matting . . . . . *between* 80 and 81
PLATE VIII
Undamaged nuts picked off the haulm at harvest . *between* 80 and 81
PLATE IX
Damaged nuts gleaned from the soil at harvest . *between* 80 and 81
PLATE X
Damaged nuts picked off the haulm at harvest . *facing* 81

OBSERVATIONS ON THE QUALITY OF STORED COTTONSEED IN KENYA

FIGURE 1
Relative humidity/moisture content equilibria for cottonseed at 25°C on saturated salt solutions 92
FIGURE 2
The relationship between mould damage and viability in cottonseed after two months' storage . . 93
FIGURE 3
Fat acidity, mould population and germination percentage after exposure for 10 days at 30°C at a range of relative humidities 94

THE FIGHT AGAINST THE LOCUST:
THE ROLE OF THE ANTI-LOCUST RESEARCH CENTRE

PLATE I
The Desert Locust. 'Ancient Enemy of Man' . *facing* 128
PLATE II
A member of the Field Research Section demonstrates the exhaust sprayer to Saudi locust officers, near Jeddah, Saudi Arabia . . . . . *between* 128 and 129
PLATE III
Wind tunnel being used to test the toxicity of insecticide sprays to flying locusts . . . *between* 128 and 129
PLATE IV
Information on locust numbers is important for research and control. A member of the Field Research Section counts a Land Rover full (about ¼ million) of locust hoppers by the shrimp measure technique . . . . . *between* 128 and 129
PLATE V
Plant Protection take part in insecticide tests on locusts during an A.L.R.C. training course in the Sudan . . . . . *between* 128 and 129

PLATES

PLATE VI
View of the library showing part of the large reprint collection . . . . . *between* 128 and 129

PLATE VII
The Desert Locust Information Service where locust reports and weather observations are plotted and correlated, and locust warnings issued. . . *between* 128 and 129

PLATE VIII
One of the controlled temperature breeding rooms showing a member of the staff wearing a special suit as a protection against locust allergens . *between* 128 and 129

PLATE IX
In a picturesque setting in Ethiopia an exhaust nozzle sprayer is used in the development of barrier spraying—a new control technique for killing locust hoppers . . . . . *between* 128 and 129

PLATE X
Locust officers from Ethiopia and Somalia using a planimeter for the analysis of swarm photographs during a training course at the Anti-Locust Research Centre . . . . . *facing* 129

PLATE XI
Saudi Arabian locust officers listen to an account of desert locust infestation in the Arabian peninsula . *facing* 129

SOME SOCIAL PROBLEMS IN TROPICAL AGRICULTURE

PLATE I
The Indian workers on the estates get a free issue of food brought to them in the middle of the day. *facing* 184

PLATE II
A defensive settlement on the slopes of the Nigerian Plateau. Courtesy: Aircraft Operating Company of Africa Ltd. . . . . *between* 184 and 185

PLATE III
In contrast, a widely dispersed Hausa village, the result of unharrassed agricultural development *between* 184 and 185

PLATE IV
A settled cattle-raising society dispersed into family communities. Courtesy: Aircraft Operating Company of Africa Ltd. . . . . *between* 184 and 185

PLATE V
An Indian harvester of oil palm with his axe and ladder. . . . . *between* 184 and 185

PLATE VI
A harvester's 'Mali', or carrier, carries the bunches of fruit to a collecting centre on the narrow gauge estate railway. . . . . *between* 184 and 185

PLATE VII
Completely mechanized handling of the harvested fruit makes it possible to produce the uniformly high quality palm oil demanded on the international market. . . . . *between* 184 and 185

PLATES

PLATE VIII
The introduction of cattle into coconut plantations is complicated by the need of the palms for drainage canals liable to be spoiled by trampling *facing* 185

THE USE OF RICE HULLS AS AGGREGATE IN LIGHTWEIGHT CONCRETE

FIGURE 1
Variation in transverse load with applied pressure 189

FIGURE 2
Increase in strength with age of concrete. . . 191

FIGURE 3
Variation in density and strength with $\frac{\text{cement}}{\text{husks}}$ ratio. 192

FIGURE 4
Variation in strength with $\frac{\text{free water}}{\text{cement}}$ ratio. . . 193

FIGURE 5
Variation in density and strength with applied pressure. 196

FIGURE 6
Variation in compressive strength with applied pressure. 198
